

Measuring Quality of Co-Curricular Assessment

Auburn University Student Affairs

2016-2017 to 2021-2022

During the fall of each academic year, members of the Student Affairs [Assessment Team](#) participate in a peer-review process using the [Quality of Co-Curricular Assessment Rubric](#) to assess departmental outcomes for each unit within the division. The scores from all outcomes are then averaged for an overall score for each of the 12 criterion listed in the rubric. Given the shorter cycle timeline due to SASOC decennial reaffirmation, reviewing did not include a peer review for 2021-22 as information was reviewed in the summer rather than later in the fall. 2021-22 initial scores were counted as final without an opportunity for revisions by departments. Each submission was reviewed twice by Assessment & Strategic Planning staff members and both scores were averaged.
